A man in a dark suit is seen from behind, standing on a balcony with a glass railing. He is looking out over a dense city skyline with many skyscrapers under a clear sky. The balcony floor is highly reflective. A large, dark, triangular graphic element is overlaid on the right side of the image, containing white text.

Enterprise Risk Management has become a specialized field and depending only on “Insurance Minded” to design your protection could be deadly!! An individual’s skill / Key man is sufficient to manage the risks. The concept of risk needs to be integrated within the corporate culture, risk appetite identified, accurately assessed, constantly monitored and evaluated to ensure adequate protection, in the ever-changing environment.

We, at Checkmate, are constantly striving towards moving the decisions on an insurance program away from the focus on pricing evaluation and understanding of the “life changing” events affecting the survival of the enterprise. This process automatically involves the constant effort to move the insurance decisions to the owners of enterprises and ensure their participation in the program.

Over the past 7 years, we have developed a unique kind of expertise that could add value to the operations of an enterprise at every stage of their business life cycle.

@ CheckMate we approach risk and risk management with both the eye Viz,

01

Presentation of your risks to the underwriters to ensure that information on process, layout, safety, housekeeping and other parameters to ensure risk-based rating. We have developed our in-house engineering team to undertake this exercise for our clients.

02

Risk identification and management requires a different set of skills for which we have associated with various risk consulting companies as per Industry needs, who specialize in risk and consequence analysis, GAP Analysis, Disaster Management, Accident Investigation, Fire Protection Systems, Business Continuity Plan and Financial Insurance GAP analysis as per contract basis.
